S5000E

CARD ISSUANCE SYSTEM

WIDE CHOICE OF ENCODING OPTIONS

The S5000E can integrate a magnetic stripe, contact &/or contactless encoding stations for EMV cards personalization.

Other types of cards can be personalized as well.

EMBOSSING AND FRONT & REAR INDENTING IN ONE SINGLE STEP

Making it one of the most versatile card issuance systems available, the S5000E can perform embossing, front indent and rear indent, all in one single step.

Suitable for either credit or debit card personalization, the 100 characters drum is included in the base machine.

If you need both layout capabilities, the upgrade to 114 characters drum is available as an option.

TOPPING MODULE

To give your embossed cards that final elegant touch, the S5000E system incorporates the Professional Topping Module. The notable aspect of this module is the availability of a wide range of topping colors and an incredibly long lasting ribbon (up to 4500 cards)!

MATICARDPRO SOFTWARE

MaticardPro, the Windows-based card design software, provides an efficient and user-friendly interface between the operator and the system. Comprising all the elements you require to easily and efficiently run card production jobs or batches the Software features a card editor together with a card management and production solution, all in a single integrated package!

TECHNICAL SPECIFICATIONS

Productivity (42 ch/card)

up to 400 cph

Recommended operating time: 8 hours/day

Base Machine
